

I think it would be a terrible decision to expand the LPFM stations to take priority over FM translators. I listen to Air 1, which is broadcast to me on an FM station- it is the only station dedicated to Christian music and advice. For some people here in Las Vegas it is the only way that they are able to meet Christ. It is in the interest of the public community to have an alternative station that is safe for people of all ages to listen to, that doesn't need to be censored. It would really be a shame if that was taken away from us. I am also a financial supporter- I send a monthly donation to them to keep doing what they do- spread the word of Jesus, I have never been a part of such a large organization that reaches so many people across the U.S. and world with such blessed news of our Lord and savior. It gives me the motivation needed to make it thru a grueling day at work, and it gives me comfort after a bad day. I know that I as well as many people, especially in my direct vicinity would be affected and disappointed if there was something trying to take Air 1 off of the air. Don't make a big mistake.
